

Lab Work

1. Write a java program for Method overloading and Constructor overloading?
2. Write a program to create a class Student with data 'name, city and age' along with method printData to display the data. Create the two objects s1, s2 to declare and access the values.
3. Write a program to create an employee class using parameterized constructor with two parameters id and name and along with method displayinfo to display the data. While creating the objects obj1 and obj2 passed two arguments so that this constructor gets invoked after creation of obj1 and obj2.
4. Write a program to print the area of a rectangle by creating a class named 'Area' taking the values of its length and breadth as parameters of its constructor and having a method named 'returnArea' which returns the area of the rectangle. Length and breadth of rectangle are entered through keyboard.
