

Lab Work

Sum of Natural Numbers:

Write a program to calculate the sum of natural numbers up to a given limit using a while loop or for loop.

Factorial Calculation:

Create a program to calculate the factorial of a given number using a while loop or for loop.

Prime Number Checker:

Implement a program to check if a given number is prime or not using control statements and loops.

Fibonacci Series:

Write a program to generate the Fibonacci series up to a specified number of terms using a while loop or for loop.

Table Generator:

Develop a program to display the multiplication table of a given number using loops.

Palindrome Checker:

Create a program to check if a given number is a palindrome or not using control statements and loops.

Armstrong Number Checker:

Implement a program to check if a given number is an Armstrong number or not using control statements and loops.

Factorization of Numbers:

Create a program to find the factors of a given number using loops and control statements.
